INTRODUCTION

These "**Guidelines for Recording the Names of Persons**" are intended to provide a set of standard rules for use when completing any of the HURIDOCS Standard Formats for the recording and exchange of information on human rights.

This set of rules is based on a number of internationally accepted standards, in particular, the *Anglo-American Cataloguing Rules*, 2 ed., 1988 revision (AACR2-88), the IFLA manual *Names of persons: national usage for entry in catalogues*, compiled by the IFLA International Office for UBC. 3 ed., 1977 and Supplement, 1980, and *The Chicago Manual of Style*, 13 ed., 1982, from which examples have been drawn.

As the title of this document indicates, it provides general guidelines for recording personal names in a standard form, style and order, whenever such data need to be recorded in a HURIDOCS Standard Format. The guidelines are provided for general applicability when completing any of these formats, independently of special requirements laid down for particular fields in any one format. For detailed instructions about choice, selection and prioritisation of personal names in each case, refer to the Scope Notes or Definitions in the Manual of the HURIDOCS format being used.

During the last years, there has been a constant increase in the diversity of nationalities, languages and cultures actively present in the HURIDOCS network. There is also a rich accumulated experience, acquired in the various training workshops, seminars, internships and other formal and informal exchange mechanisms within the network. In the course of these, the needs of producers and users of information worldwide have been clearly expressed and debated, always with the overall aim in mind of achieving the highest possible level of compatibility. These elements are the reason for expanding the present **Guidelines**.

With the inclusion of more precise rules for recording names in different languages as well as other guidelines on how to solve more difficult problems, HURIDOCS aims to provide more satisfactory solutions to the majority of users who are achieving, or aim at achieving, an ever higher level of standardisation and efficiency in the recording and exchange of human rights information.

HURIDOCS wishes to acknowledge the American Library Association, the Canadian Library Association and the Library Association Publishing Ltd. for their permission to reprint or extract parts of the *Anglo-American Cataloguing Rules*.
